

## Acne Peel

### Why Face Reality peels over other peels?

Face Reality peels are strong enough to have the exfoliation, antibacterial & skin lightening properties needed for acne, but gentle enough so the client can continue using their home care the next day. They are self-neutralizing peels that do not need to be washed off and this makes them less irritating.

### Are Face Reality peels just for acne?

Absolutely not. This blend of acids & ingredients is also amazing for anti-aging and for pigmentation.

### After care:

Do not use your "active" products (serums or acne med) the night of your treatment. Since the peel is self-neutralizing, do not wash your face for 5-6 hours after.

How long to be off prescription products or Accutane before treatments:

Depending on topical prescription products, you need to discontinue 2 weeks before starting Face Reality. Accutane needs to be discontinued for 6 month prior.

### What is in Face Reality Peels:

Acne Peel 1:

5 % TCA

5% Mandelic

5% Lactic

blend of azelaic & kojic acids to lighten pigmentation

### Acne Peel 2:

7.5% TCA

5% Mandelic

5% Lactic

blend of azelaic & kojic acids to lighten pigmentation

### What is the downtime?

With acne peel 1 most clients do not get dry or irritated. If you were to have any "peeling" it would be light flaking, not peeling in big sheets. When you bump up to acne peel 2, you may experience more dryness & slight flaking. This peel is designed for little to no irritation and/or flaking. Just moisturize lots the next few days following.
